Quiz, 10 questions

## **✓** Congratulations! You passed!

Next Item

1/1 points

1.

Suppose I define the following function in R

What is the result of running

```
1 cube(3)
```

in R after defining this function?

- The users is prompted to specify the value of 'n'.
- A warning is given with no value returned.
- The number 27 is returned

## Correct

Because 'n' is not evaluated, it is not needed even though it is a formal argument.

An error is returned because 'n' is not specified in the call to 'cube'

1/1 points

2.

The following code will produce a warning in R.

Why?

 $\mbox{'}\mbox{x'}$  is a vector of length 10 and 'if' can only test a single logical statement.

Week 2 Quiz		10/10 points (100%)
Quiz, 10 questions	The expression uses curly braces.	
	The syntax of this R expression is incorrect.	
	You cannot set 'x' to be 0 because 'x' is a vector and 0 is a scalar.	
	There are no elements in 'x' that are greater than 5	

1/1 points

Consider the following function

```
f <- function(x) {</pre>
             g <- function(y) {</pre>
                      y + z
             }
z <- 4
5
6
7 }
             x + g(x)
```

If I then run in R

```
1 z <- 10
2 f(3)
```

What value is returned?

4

10

Correct

16

1/1 points

4.

Consider the following expression:

Week 2 Quiz x <- 5 Quiz, 10 questions 3  $y \leftarrow if(x < 3)$  { 4 } else { 5 6 }

10/10 points (100%)

What is the value of 'y' after evaluating this expression?

Correct

1/1 points

5.

Consider the following R function

```
h <- function(x, y = NULL, d = 3L) \{ z <- cbind(x, d) \}
               if(!is.null(y))
3
                         z <- z + y
6
                         z \leftarrow z + f
               g \leftarrow x + y / z
8
               if(d == 3L)
                         return(g)
10
               g < -g + 10
11
               g
12
```

Which symbol in the above function is a free variable?

Correct

1/1

Week 2  Quiz, 10 quest	<b>@uiz</b> What is	s an environment in R?	10/10 points (100%)
		a collection of symbol/value pairs	
	Corre	ect	
		a special type of function	
		an R package that only contains data	
		a list whose elements are all functions	
	<b>~</b>	1/1 points	
	7. The R I	anguage uses what type of scoping rule for resolving free variables?	
		global scoping	
		lexical scoping	
	Corre	ect	
		compilation scoping	
		dynamic scoping	
	<b>~</b>	1/1 points	
	8. How ar	re free variables in R functions resolved?	
		The values of free variables are searched for in the working directory	
		The values of free variables are searched for in the environment in which the fur was called	nction
		The values of free variables are searched for in the global environment	
		The values of free variables are searched for in the environment in which the fur was defined	nction
	Corre	ect	

		ය ගුරු
Cor	rect	
	It is the environment in which a function was called	
	It is the environment in which a function was defined	
	It is always the global environment	
	It is the package search list	
10. In R, v	what is the parent frame?	
~	1/1 points	
	R objects cannot be larger than 100 MB	
Cor	rect	
	All objects must be stored in memory	
	Functions cannot be nested	
	All objects can be stored on the disk	
Quiz, 10 questi <mark>9</mark> ns What	is one of the consequences of the scoping rules used in R?
